Education

M.Sc. Engineering Exchange – Electrical & Computer Engineering

TUM School of Computation, Information and Technology (CIT)

Oct 2025 – Present

Munich, Germany

- **Completed Coursework (Winter Semester):** Convex Optimization, Machine Learning in Energy Management, Integration of Renewable Energies, Fundamentals of Energy Modelling, and Energy Systems & Energy Economy.
- **Lab Energy Informatics:** Programmed algorithmic solutions across key power system topics including Wind-Power Forecasting, Optimal Residential Energy System Sizing, Unit Commitment, Optimal Power Flow, Load Disaggregation, and Distribution Grid Simulation.
- **Current Curriculum (Summer Semester):** Energy Trading, Energy Informatics, Risk Assessment, Blockchain and Systems Engineering.
- **Technical Seminars:** Peer-to-Peer (P2P) Energy Trading (evaluating blockchain-based security architectures on smart grids); Natural Gas/Food Analysis Seminar (modeling Haber-Bosch and Steam Methane Reforming dependencies against resource shocks).

M.Sc. Candidate in Engineering Nanoscience / Civilingenjör

Lund University, Faculty of Engineering (LTH)

2022 – Present

Lund, Sweden

- Completed integrated B.Sc. in Engineering Nanotechnology as part of the 5-year professional degree program.
- Core Competencies: Quantum mechanics, solid-state physics, materials chemistry, thermodynamics, electronic materials, and high-level engineering mathematics.
- Advanced Track: Specializing in energy systems
- Master's Thesis: Pending

Exchange Student – Senior High School Year

Olathe East High School

2017 – 2018

Kansas, USA

- Completed a wide range of academic courses with full English-language immersion.

Professional Experience

Project Manager – HVAC Engineering

Hankylon AB

2020 – 2022

Bålsta, Sweden

- Headed a multi-million SEK ventilation modernization and optimization project spanning 500+ residential apartments.
- Led and coordinated a cross-functional on-site execution team of 20 people.
- Directed technical execution, resource planning, and structural integration for residential HVAC systems.

International Ambassador

Education First (EF)

2018

New York, USA

- Selected to manage, guide, and facilitate airport transit and local logistics for large-scale international groups of 200–600 exchange students on Manhattan.

Leadership & Volunteering

Committee Member & Mentor

LESS / LTH Physics Guild / Göteborgs Nation

2023 – Present

Lund, Sweden

- Manage logistics and safety operations for outdoor/indoor top-rope and bouldering events.
- Coordinated a 5-week university orientation framework to welcome and integrate incoming students.
- Directed logistical execution, budgeting, and risk management for large-scale social events.

Technical Skills & Certifications

Programming Languages: Python (NumPy, pandas, PyTorch, Scikit-learn), Java, MATLAB, Assembly, SystemVerilog

Engineering & Lab Work: Cleanroom Microfabrication, Data Analysis, Modeling

Memberships & Interests: Mensa International · Skiing & Alpine Ski Touring · Hiking · Windsurfing · Climbing

Languages

Swedish: Native Speaker

English: Full Professional Proficiency (C1)

Spanish: Elementary Proficiency (A1)
